

## Themes & Plugins

### Description

To have a new theme or plugin added to a campus.albion.edu blog, it must first be requested.

All theme and plugin requests will be tested by the web administrator to ensure it will not create issues on the the campus.albion.edu system. Once all checks are passed, the web administrator will reach out to the requestor either confirming or denying the request.

To request a theme or plugin be added to your site, please email [insttech@albion.edu](mailto:insttech@albion.edu).

- *Theme* – A theme is essentially a way to “skin” your blog site. It helps to control the presentation and design of your website. To search available themes, visit [wordpress.org/themes](https://wordpress.org/themes).
- *Plugin* – A plugin is a piece of software that extends functionality or adds new features to your WordPress site. Some plugins allow your site to easily add social media icons, share links, calendars, and almost any added feature you can imagine, utilizing a few simple lines of code. Plugins are meant to help those who don’t understand code, create a diverse site. To search available plugins, visit [wordpress.org/plugins](https://wordpress.org/plugins).
